

USB TYPE-C ECO BUILT CABLE

BENEFIT AN ECO-DESIGNED AND EFFICIENT CABLE

T'nB has always been able to stay on the cutting edge of technology and offer accessories in line with market innovations, but today a much bigger issue is under way.

The ecological impact of companies like ours must be reduced, T'nB became aware of this several years ago and we decided to intensify these efforts to reduce our production and waste of polluting materials.

T'nB's eco-range is the result of months of research to offer eco-designed technology products that meet our quality criteria.

This cable is made of 45% plant material which results in a reduction in the use of plastic in its design. The plastic that goes into the composition of this cable is made of TPE, which today is the easiest plastic to recycle.

Recharge and sync all your devices with a USB Type-C port.

This 1.5M USB 2.0 to USB Type-C cable connects your device with a USB-type-C port to a device with a standard USB port (USB-A).

Fast charge up to 15W

Let's act together for the planet

USB TYPE-C ECO BUILT CABLE

Characteristics

Characteristics: 5V / 2,4A
Collection: Eco
Compatibility: USB-C
Connectivity: USB-A / USB-C
Cable function: Charge & data synchronisation
Length (cm): 150
Max power (A): 2,4
Max power (W): 15

Box contents

USB Type-C cable

Color:
Packing: 6
Guarantee: 2 year(s)
Net weight (g): 28
Weight with packaging (g): 51
