

Smart finder for bike and e-scooter

FIND YOUR BIKE OR SCOOTER WITH THIS SMART FINDER THROUGH APPLICATION APPLE FIND MY

UMATAG is a location tag that allows you to easily locate and find your bike or e-scooter using Apple Find My. Equipped with a clamp, the installation of this accessory is simple and universal under the saddle of your bike or on the frame of your scooter. You can see its location on your iOS Find My app. It also serves as a reflector, so it is less visible to thieves.

When you cannot find your UMATAG, you can put a sound to determine its location. Location information is only sent by Apple when you actively locate the device, mark it as lost, or turn on sending Apple's last location. Data is encrypted on Apple's servers, and when using the Find Network, everyone's information is confidential, even to Apple. To use the Apple Find My application with the UMATAG, you must have the latest version of iOS, iPadOS or macOS. The Find Items app on Apple Watch requires the latest version of watchOS.

Certified MFI by Apple
 Bluetooth system 32-bit BLE 5.2 processor
 Works with Apple's Find My Network and MFI certification.
 No need to install any apps, just use iOS Find My app.
 Battery type: CR2032 (user replaceable)
